

## NEWSLETTER

### Highlights

**1 Improving data completeness**  
We saw an increase in data completeness in our 2019 annual report, but there is still room for improvement!

**2 How are you using your data?**  
Browse a [selection of resources](#) on our website to help summarize and present your Trusts results from the NABCOP 2019 Annual Report, including the NABCOP Local Action Plan Template.

**3 The NABCOP area of the 'MyNHS' website closes soon**  
Clinical Outcomes Publication programme (COP) data will shortly be removed from 'MyNHS', aimed at patients and the public, due to the decommissioning of the website.

### KEY 2019 DATES

**Nov 30:** Cut off for 2018 COSD data uploads; this data will be used in the 2020 Annual Report

**Dec 20:** Cut off for feedback to the NABCOP team on the 2019 Annual Report, for consideration when drafting the 2020 Annual Report

### Data completeness for NABCOP

We wanted to thank you for increasing the data completeness of our 2019 Annual Report. By receiving complete datasets, we can capture a more accurate picture of breast cancer care for elderly patients across England and Wales. See chapter 3 of the report for more details.

Not sure how to improve? We're here to help! We have resources for Trusts on how to achieve better data collection:

### Key NABCOP metrics with CQC inspectors

In order to reduce national variation of breast cancer management, some key metrics from the NABCOP data have been shared with the CQC inspectors, to be reviewed during visits to Trusts. This will facilitate trust engagement, drive improvement, and support health care providers in their data acquisition.

### Have you seen our regional presentation slide set template?

Present your trust data at departmental meetings to compare with results from providers at national level.
