Kenya-UK Health Alliance 1<sup>st</sup> Breast Cancer Awareness Week  
4<sup>th</sup> October 2021

# Welcome

Kenya and the UK have a long and significant friendship which has stood the test of time. A mutual desire to 'do the right thing', an inclusive society and a rich sense of humour (often in adversity) are amongst the characteristics that have kept our partnership through some challenging times as key members of the Commonwealth.

At the core of every successful society is the health of its people. Healthcare, however, is not static. As we expand our knowledge of the determinants of disease, improve the patient experience through multidisciplinary team working and as the demographics of disease change, we must adapt and continue to learn so that we can continually, as healthcare workers, offer our patients the highest quality of healthcare.

The recent pandemic has taught us many things but, perhaps more than anything, it has demonstrated that we cannot 'be the best we can be' unless we develop partnerships between workers, institutions, places and governments in different countries focused on mutual health system strengthening and peer learning. The recent launch of the Kenya-UK Health Alliance is a manifestation of such sharing and this course represents a model of best practice for our partnership.

It is with great pleasure and privilege that I welcome you to this course, whether organiser, teacher or learner. It is an outstanding example of mutual learning delivered by many of the leading breast cancer experts in both countries. It will, I am sure, act as a template for many more such events in the very near future and I hope that it serves to strengthen our friendship for many more generations to come.

Prof. Ged Byrne MBE

Director of Global Health Partnerships, Health Education England

Consultant Surgeon MFT

Kenya-UK Health Alliance 1<sup>st</sup> Breast Cancer Awareness Week  
4<sup>th</sup> October 2021

# Monday 4<sup>th</sup> October 2021
