

National Breast Screening Programme

An audit of screen detected breast
cancers for the screening year April 2023
to March 2024 – Data tables

Version 1

Data source

Data for the women diagnosed with screen-detected breast cancer in England with a date of first offered screening appointment between 1st April 2023 to 31st March 2024 was uploaded by individual screening services via the Breast Screening Information System (BSIS). The source of these data was the National Breast Screening System (NBSS). A series of data validation checks were automatically applied, and individual explanations were required before data could be successfully uploaded. On receipt of the national data, a comparison with the data held by the English cancer registry was undertaken to identify cases with a previous diagnosis of breast cancer. These cases were excluded for specified analyses from tables 4-83.
