GUIDELINE	DOCUMENT	ORGANISATION / COUNTRY	YEAR PUBLISHED
Fibroadenoma management	ABS Summary Statement: Management of fibroadenomas	Association of Breast Surgery, UK	2019
<p>Comments:</p> <p>This guidance document on the management of fibroadenomas has been produced by the ABS with the involvement of representatives from the British Society of Breast Radiologists and the National Co-ordinating Committee of Breast Pathology.</p>			
Management of nipple discharge	ABS Summary Statement: Guidelines for the investigation and management of spontaneous nipple discharge in the absence of a breast lump	Association of Breast Surgery, UK	2019
<p>Comments:</p> <p>This guidance document on the management of nipple discharge has been produced by the ABS with the involvement of representatives from the British Society of Breast Radiologists and the National Co-ordinating Committee of Breast Pathology.</p>			
Documentation	ABS Summary Statement: Breast operation note documentation	Association of Breast Surgery, UK	2015
<p>Comments:</p> <p>None</p>			
Documentation	ABS Summary Statement: Consent Best Practice	Association of Breast Surgery, UK	2018
<p>Comments:</p> <p>The principle of consent is an important part of medical ethics and human rights law. The ABS' Clinical Practice and Standards Committee has produced this best practice guidance for its members.</p>			
Antibiotic prophylaxis	ABS Summary Statement: Guidelines on antibiotic prophylaxis in breast surgery	Association of Breast Surgery, UK	2015
<p>Comments:</p> <p>None</p>			
Antibiotic prophylaxis	Prophylactic antibiotics to prevent surgical site infection after breast cancer surgery (review)	Cochrane Library, UK	2014
<p>Comments:</p> <p>The comprehensive review by the Cochrane team concludes that prophylactic antibiotics can reduce surgical site infection in breast cancer surgery. The Cochrane reviewers do not comment on antibiotic usage in breast reconstruction patients. This topic is covered by the ABS summary statement.</p>

Breast Surgery

GUIDELINE	DOCUMENT	ORGANISATION / COUNTRY	YEAR PUBLISHED
VTE	Venous thromboembolism prophylaxis for patients undergoing breast operations	Cochrane Library, UK	2015

Comments:

The incidence of VTE is lower after breast surgery than that seen following abdominal or lower limb surgery. The American Society of Breast Surgeons have produced well referenced recommendations on VTE prophylaxis for breast patients. ABS finds this document a useful tool that members could consider during discussions with their own hospital trust when formulating local VTE prophylaxis regimes.

Wound drains	Wound drainage after plastic & reconstructive surgery of the breast	Cochrane Library, UK	2015
---------------------	--	----------------------	------

Comments:

The Cochrane Reviewers find little evidence to support the routine use of drains following reduction mammoplasty. They conclude that there are not enough published data to make recommendations for routine drain use in breast reconstruction.
